

## 前台

Goods.vue

line:211

新建

```
    sxj(val){
      val.saleable=val.saleable?0:1
      this.$message.confirm('是否下架商品?')
        .then(() => {
          this.$http.put("/goods/sxjGoods",val)
            .then(() => {
              this.getDataFromApi();
              this.$message.success('下架成功!');
            })
        })
      .catch(() => {
        this.$message.error('已取消下架');
      });
    }
```

```
sxj(val){
  val.saleable=val.saleable?0:1
  this.$message.confirm('是否下架商品?')
    .then(() => {

      this.$http.put("/goods/sxjGoods",val)
        .then(() => {
          this.getDataFromApi();
          this.$message.success('下架成功!');
        })
    })
  .catch(() => {
    this.$message.error('已取消下架');
  });
}
```

line: 52

调用

```
<v-btn icon small v-if="props.item.saleable" @click="sxj(props.item)">下架</v-btn>
<v-btn icon v-else @click="sxj(props.item)">上架</v-btn>
```

```
<v-btn icon small v-if="props.item.saleable" @click="sxj(props.item)">下架</v-
btn>
  <v-btn icon v-else @click="sxj(props.item)">上架</v-btn>
```

完成!!!
